

Installing AH Formatter V7.2 for 64bit MAC

To install AH Formatter V7.2, please follow the steps below.

Download install image

Download the install image from the following URL.

[AH Formatter V7.2 64bit MAC](#)

Install AH Formatter V7.2

1. Login as administrator user.
2. Extract the contents by double-clicking the downloaded file.
3. Double-click the package file in the created folder.

Mac OS X 10.8 or later: If an error appears (V7-2-R1-MacOSX_X86_64E has not been signed by a recognized distributor), control-click on the package file, and choose "Open" from the context menu. Click "Open" in the warning dialog that appears.
4. The installation program starts and the screen "Welcome to AH Formatter 7.2 installation" is displayed. Click the "Next" button.
5. Choose the installation folder. First, choose the destination volume. Next, choose the installation folder, then click the "Open" button. If you are sure you installed the file in that folder, then click the "Continue" button. The default installation folder for AH Formatter V7.2 is set to "/usr/local/AHFormatterV72".
6. Click the "install" button. Then input a password for the confirmation of the installation.
7. If the installation is completed normally, you will see the message "software was successfully installed". Click the "Close" button and end the installation program.

License Key Installation

1. Copy the "ahformatter.lic" file into the "etc/" subdirectory of your new install directory after installing AH Formatter.

Final destination: /usr/local/AHFormatterV72/etc/AHFormatter.lic
2. You can confirm the license has been copied correctly by running:

```
sh /usr/local/AHFormatterV72/run.sh -v
```

Uninstall AH Formatter V7

Drop all the installation folders of AH Formatter V7.2 into the Trash.

NOTE: AH Formatter V7.2 can be installed and evaluated without uninstalling earlier versions.
